

Random Length Shipment Policy

Elipticon Wood Products Inc. will supply random length millwork based on the following breakdowns whenever possible, with the additional considerations listed below.

Typical Random Length Breakdown

4' – 10'	35-45 % (NO more than 10% of that will be 4-6')
11' – 12'	35-40%
13'+	15 – 30%

Based on the normal characteristics of certain species where longer lengths are difficult to obtain or not available, the following species will be available with 12' max length.

- Alder (Knotty and Superior)
- All Rift and Quarter Sawn
- White Ash
- Beech
- Most import woods
- ***Black Walnut*** inquire for lengths longer than 10'

Since we defect our material prior to shipment some lengths will be trimmed to eliminate exposed defects. This sometimes results in the shipment of boards 4' through 6', **Elipticon** commits to ship no more than 10% of these lengths in your random length packs.

Lastly, **Elipticon** commits to ship a minimum of 15% 13'+ whenever possible. If this is not attainable without a special order the customer will first be contacted to determine if a special shipment is required or if the shipment of more 11'through 12' will satisfy the job.
